

NEW TITLE FROM EDWARD ELGAR PUBLISHING

# Modelling Sustainable Development

Transitions to a Sustainable Future

Edited by **Reyer Gerlagh**, University of Manchester, UK,  
**Valentina Bosetti**, Fondazione Eni Enrico Mattei (FEEM), Italy  
and **Stefan P. Schleicher**, University of Graz, Austria

This book explores the issue of sustainable development in its more operative and applied sense. Although a great deal of research has addressed potential interpretations and definitions of sustainable development, much of this work is too abstract to offer policy makers and researchers the feasible and effective guidelines they require. This book attempts to redress the balance. The authors demonstrate the importance of identifying practical means to assess whether policy proposals, specific decisions or targeted scenarios are sustainable. They also highlight how various indicators and aggregate measures can be included in models that are used for decision-making support and sustainability assessment.
