

The Ecole Centrale Paris is recruiting a Researcher in Environmental and Energy Economics

The Ecole Centrale Paris - the second French Grande Ecole of Engineering - recruits a post-doctoral researcher in Environmental and Energy Economics: contract of 18 months (renewable once). The main themes are: sustainable growth, innovation and human capital, innovative regulation.

Within the research team in Economics and Management of the Ecole Centrale Paris (ÉPOCC/LGI), you will conduct and supervise research 80% of your working time.

Within the Teaching Department of Sciences for firms, you will have to teach in Economics for our students in engineering as well as for our Master's students 20% of your working time.

The following criteria will be specifically considered for the selection of candidate:

- PhD in Quantitative Economics (acquired fewer than 3 years ago)
- Ability to work in teams
- Ability to publish and to communicate in English
- Ability to speak French
- Autonomy and motivation

Candidates must send an email that contains:

- Detailed CV
- Letter of motivation
- Reports of PhD
- Thesis and articles

Applications are to be filed before February 15, 2012.
