Focus on

EAERE Journal Impact Factors

The Review of Environmental Economics and Policy's 2017 Impact Factor is 4.419, which is an excellent result and a 14% increase from the 2016 impact factor of 3.862. The 2017 impact factor ranks REEP 13th of 353 journals in the Economics category and 11th of 108 in Environmental Studies. The 5-year impact factor for REEP is 6.564.

The 2017 Impact Factor for Environmental and Resource Economics is 1.961; a good 24% increase from the 2016 impact factor of 1.582. The 2017 impact factor however ranks ERE as 84th of 353 Economics journals and 55th of 108 journals in the Environmental Studies category. The 5-year impact factor for ERE is 2.308.

EAERE-ETH Winter School

The European Association of Environmental and Resource Economists (EAERE) and the Swiss Federal Institute of Technology Zurich (ETH Zurich) launched a new EAERE-ETH European Winter School series in Environmental and Resource Economics. The 2019 Winter School is titled **The Economics of Energy Transition** and will take place from **27 January – 1 February 2019** in **Ascona, Switzerland**.

The deadline for applications is **14 September 2018**.

The school will focus on the public policies that support the transition to a greener energy mix. Public policies that aim not only to reduce the carbon footprint of electricity generation but also to improve air quality through less nitrogen oxides, sulphur oxides and particulate matters. The lectures will examine the emergence, design and impacts of those public policies including carbon trades, cap-and-trade, emission standards, subsidies to R&D, feed-in tariffs and renewable portfolio standards, and intellectual property rights for green innovations. Both theoretical and empirical approaches will be covered.

See the school [website](#) for more information.

Policy News

EU & China reaffirm strong commitment to Paris Agreement. European Council President Donald Tusk, European Commission President Jean-Claude Juncker, and Chinese Premier Li Keqiang issued a 16-point joint statement with an annex on climate change and clean energy following the 20th EU-China Summit in Beijing. The leaders highlighted the impact of climate change and importance of taking action, also calling on other nations to step up climate action. They expressed their commitment to advance cooperation on the implementation of the Paris Agreement, and full support for the upcoming COP24 taking place in December 2018 in Katowice, Poland. The statement further discusses the promotion of a global clean and low-carbon energy transition, especially towards sustainable, affordable, reliable, and modern energy services. EU & US held their 8th Energy Council. Discussions focused on energy infrastructure, innovation, and transitions as important means of promoting transparent, open, and secure energy markets. Read the [press release](#).

EU & US deal looks to diversify Europe's energy supply. Following President Juncker's visit to the White House, the leaders agreed to strengthen strategic cooperation with respect to energy. The European Union plans to import more liquefied natural gas from the United States to diversify its energy supply. Read the [press release](#).

Spain, France and Portugal sign the Lisbon Declaration. At the Lisbon Summit, leaders took stock of the progress achieved in better integrating the Iberian Peninsula into the internal energy market, and formally agreed on ways to strengthen the regional cooperation between Spain, France and Portugal. The Lisbon Declaration sets out the way forward, signifying the EU's willingness to complete the Energy Union and fulfill its commitments under the Paris agreement.
